Application/Control Number: 10/719,444

Art Unit: 3654

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 7-9 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "improved" should be deleted.

For clarity and/or definiteness, it appears that "5" (claim 7, line 1) should be -6--.

Claims 8 and 9 recite the limitation "said thermoplastic polyester resin and thermoplastic polyester resin blends". There is insufficient antecedent basis for this limitation in the claims.

All claims should be revised carefully to correct all other deficiencies similar to the ones noted above.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Czuprynski et al (US-6042048). Czuprynski et al discloses a device having substantially all the claimed features but does not disclose the wear rate coefficient. However, the claimed wear rate would have been obvious to a person having ordinary skill in the art to reduce wear and tear since the to-strive-for wear rate is zero. In other words, it would have been

Art Unit: 3654

obvious to a person having ordinary skill in the art to provide the Czuprynski et al apparatus with an inner annular surface with a wear rate of zero to eliminate wear and tear, which zero rate meets the claimed limitation.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art.

Applicant's admitted prior art includes the discussion on pages 1-2 of the specification disclosing cores made of HIPS resin. Pages 7-12 disclose commercially available resins. It would have been obvious to a person having ordinary skill in the art to make the prior art core with the commercially available resins to obtain the advantages/characteristics of those commercially available materials which inherently include the limitations in claims 11-15.

The German document on PTO-1449 has not been considered because it does not meet 37 CFR 1.98.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Q. Nguyen whose telephone number is (571) 272-6952. The examiner can normally be reached on Monday, Tuesday, Thursday, and Friday, from 7:00 AM to 4:30 PM. The examiner can also be reached on alternate Fridays.

Application/Control Number: 10/719,444 Page 4
